

ELAN3-ALARM

ETHERNET COMMUNICATOR

ELAN3-ALARM operates in IP-based networks. It is synced with alarm system ESIM364 and GSM/GPRS communicator ET082. The device enables instant Internet access allowing to establish a communication between ESIM364 or ET082 and EGR100, Kronos IP, SIA IP protocol-based monitoring station software. ELAN3-ALARM can be used to connect ESIM364 to Eldes Smart Security platform.

FEATURES

- Supported Ethernet connectivity: 10/100 Mbit
- Enables Internet access on ESIM364, ET082 via Ethernet interface
- Automated configuration
- Supported protocols: EGR100, SIA IP, Kronos

TECHNICAL SPECIFICATIONS

Power supply **10-24V 50Hz ~ 210mA max. / 10-24V 210mA max.**

Operating temperature range **-20...+55 °C**

Dimensions **63x82x17 mm**

HOW IT WORKS?
